PROFESSIONAL SUMMARY

Full-stack web developer with 11+ years of experience building production web systems in VB.NET, C#, and ASP.NET Core. Founder of KardGrabber (BusinessCardGrabber), my own AI product that turns photographed business cards into searchable team contacts. Previously led technical delivery at Authentic Ventures across OfficeCentral and related platforms, shipping 13+ projects for 40+ customers. Combines application development with a hands-on IT and networking background. Open to freelance and full-time roles.

TECHNICAL SKILLS

Languages & frameworks: C#, VB.NET, ASP.NET Core, PHP, CSS

Practice: Full-stack web development, AI product development, Project management, Disaster recovery

Infrastructure: Networking, PWA / offline sync, Server maintenance, Cabling and connectivity

PROFESSIONAL EXPERIENCE

Founder & Full-Stack Developer | KardGrabber (BusinessCardGrabber) **2026 – Present**

- Designed, built, and shipped KardGrabber (kardgrabber.com), my own AI product that turns photographed business cards into organized digital contacts.
- Implemented phone-camera and photo-upload capture, then AI extraction of name, title, company, email, phone, website, and address with a review-before-save step.
- Built company workspaces with login-protected, role-based access so teams share one contact library instead of scattering cards across personal phones.
- Added search, LinkedIn lookup, optional website verification, and offline capture with later sync for events with poor connectivity.

Web Developer | OfficeCentral at Authentic Ventures **2015 – 2022**

- Led a technical team to meet project deadlines and deliver production web applications for Authentic Ventures and its clients.
- Owned both front-end and back-end development for OfficeCentral and related platforms built in VB.NET and C#.
- Designed and maintained disaster recovery plans so production systems stayed available during incidents.
- Delivered 13+ completed projects serving 40+ customers across banking, licensing, and community platforms.

IT Technician | Self-employed

- Troubleshot networking and connectivity issues to restore connections and network access.
- Performed routine maintenance on servers and systems, keeping networks operational during peak periods.

Network Technician | Self-employed

- Resolved routing, wireless, and other network-related issues for clients.
- Installed wiring, cabling, and devices to establish, repair, and improve network operations.

SELECTED PROJECTS

KardGrabber (BusinessCardGrabber) · kardgrabber.com **ASP.NET Core**

Personal product (Founder). My own AI business-card grabber: photograph a card on phone or desktop, extract contact fields in 15–30 seconds, and store them in a searchable company workspace with team permissions and offline mode.

OfficeCentral · v2.officecentral.asia **VB.NET**

Authentic Ventures Sdn. Bhd. Production office platform delivered as a full-stack VB.NET web application.

AssetCentral · v1.assetcentral.asia **VB.NET**
Authentic Ventures Sdn. Bhd. Asset management web system built for Authentic Ventures.

MySedeqah · sys.mysedeqah.com **VB.NET**
Authentic Ventures Sdn. Bhd. Web application supporting charitable giving operations.

Board of Engineers Malaysia · engineer.org.my **VB.NET**
The Board of Engineers Malaysia (BEM). Public-facing web platform for Malaysia's professional engineering board.

MyMasjid · app.mymasjid.asia **C#**
Authentic Ventures Sdn. Bhd. C# application originally used by Agrobank, one of Malaysia's major banks.

EDUCATION

Bachelor of Computer Science **2013 – 2015**
Universiti Selangor. Deepened systems development skills in VB.NET, C#, and mobile languages.

Diploma in Computer Applications in Business **2008 – 2013**
Universiti Selangor. Studied mobile programming, web programming, computer fundamentals, and business applications.
